10+ years	100+ people	+26%	₹6 Cr / month
cross-functional operating depth	led across operations & growth	sales efficiency improvement	revenue operations supported

EXECUTIVE PROFILE

Business systems and AI automation operator with 10+ years across growth, revenue, CRM, product, people, operations and P&L. I diagnose where context disappears, decisions slow down or work repeats; redesign the operating model; then use AI, automation and rapid product development to turn the new workflow into something teams can adopt. Best suited to AI Automation, Business Transformation, Product / Program Operations and Growth / Revenue Operations leadership roles.

PROFESSIONAL EXPERIENCE

Sales Manager, AI Programs Aug 2026 - Present
GrowthSchool / Outskill | Hyderabad

- Lead a 10-member AI consultant team across daily performance, funnel discipline, call coaching, product knowledge and manager cadences.
- Use Superleap, CRM signals, Slack and LLM workflows to improve lead prioritisation, follow-up control, individual coaching briefs and management visibility.
- Translate complex AI programs into consultative conversations, practical demonstrations and repeatable team playbooks.

Senior Business Manager - Growth, Revenue & Business Operations Sep 2024 - Jun 2026
Parikshe by SIFF Ventures Pvt. Ltd. | Bengaluru

- Owned acquisition, CRM, pipeline, pricing, budgets, payments, onboarding, product priorities and operating decisions across multiple education products.
- Connected Sales, Marketing, Product, Technology, Academics and Operations through shared metrics, workflows, ownership rules and escalation paths.
- Built workflows with Meritto, WhatsApp Business API, n8n, Razorpay webhooks and Google Sheets to improve routing, reconciliation, reporting and onboarding control.
- Took Powerguides from concept to market and sold 900 copies in three months; scaled the organisation's YouTube audience from 27K to 400K+ subscribers.

Associate General Manager - Growth & Business Operations Oct 2021 - Sep 2024
Physics Wallah / iNeuron.ai | Bengaluru

- Led a 60+ member setup across Inside Sales, CRM, Digital Marketing, Student Success and Business Operations.
- Improved sales efficiency by 26% through lead scoring, CRM workflows, follow-up SOPs, manager reviews and performance dashboards.
- Supported approximately ₹6 crore in monthly revenue operations through planning, forecasting, capacity management, conversion reviews and payment visibility.

- Managed operations, sales coordination, P&L inputs, cost control, manpower planning, scheduling and reporting across a 120+ employee unit.
- Increased output by 46% through process redesign and daily performance management; improved unit profitability by approximately 30% through cost optimisation and structured reviews.
- Introduced Lean / Six Sigma practices, SOPs, MIS and risk reviews to strengthen quality, accountability and delivery performance.

Earlier career: Marketing Executive - Sales & Customer Acquisition, Tikona Infinet Ltd., Mumbai | Oct 2015 - Aug 2017

SELECTED PRODUCTS & AI SYSTEMS

OrgManager	Founder / Product builder	Live MVP
India-first multi-tenant Business OS connecting CRM, projects, people, automations, communications and intelligence. Mapped the business hand-offs, defined the product model and rules, designed the workflows, built the web experience and released the public MVP.		
Personal AI Operating System	Workflow architecture	Applied
A human-in-the-loop system that turns information from ChatGPT, Claude, Slack, meetings and documents into decisions, drafts, reminders and finished work while preserving approval at consequential steps.		
JoVE Adoption Engine	Rapid product prototype	Built
Converted a complex product adoption challenge into an interactive syllabus-to-value workflow, using structured context and rapid prototyping to shorten the path from idea to user feedback.		

LEADERSHIP FIT

Business diagnosis	Find the constraint before automating the symptom; connect customer, process, economics and team behaviour.
AI workflow design	Design context, reasoning, retrieval, actions, safeguards and human approval as one operating system.
Cross-functional execution	Turn leadership priorities into owners, cadences, dashboards, SOPs and measurable follow-through.
Adoption & measurement	Prototype with users, drive behaviour change and tie the system to time, cost, quality, conversion or revenue.

TOOLS & METHODS

AI & automation: ChatGPT, Claude, Gemini, NotebookLM, custom assistants, agentic workflows, n8n, APIs and webhooks
Operations systems: Salesforce, Meritto, LeadSquared, Superleap, WhatsApp Business API, Razorpay webhooks, Slack and Google Sheets
Analytics & delivery: Funnel analysis, dashboards, MIS, GA4, GSC, workflow mapping, SOPs, exception handling, training and continuous improvement
